

Odoo ERP/CRM Learning Journey

Day 1 – Introduction to ERP, CRM & Odoo

Learning Objectives

By the end of Day 1, you will understand:

- What is ERP?
 - What is CRM?
 - Why do companies use ERP?
 - What is Odoo?
 - Odoo Architecture
 - Odoo Editions
 - Odoo Modules
 - Odoo Workflow
 - Real-world Business Example
-

1. What is ERP?

ERP stands for

Enterprise Resource Planning

ERP is software that helps manage **all departments** of a company in one system.

Instead of using different software for Sales, HR, Inventory, Accounting, and Purchase, ERP connects everything together.

Without ERP

Sales Department

Excel Files

Inventory

Another Software

HR

Paper Records

Accounting

Different Software

Problems:

- Duplicate data
- Human errors
- No real-time reports
- Slow communication

With ERP

Everything is connected.

====

2. What is CRM?

CRM means

Customer Relationship Management

CRM helps businesses manage:

- Customers
- Leads
- Opportunities
- Sales
- Follow-ups
- Emails
- Meetings

Example:

Customer visits website

↓

Lead created

↓

Salesperson contacts customer

↓

Quotation sent

↓

Customer buys product

↓

Invoice generated

↓

Customer Support

Everything happens inside CRM.

3. What is Odoo?

Odoo is an **open-source ERP & CRM platform** built primarily with **Python** and **PostgreSQL**.

It provides many business applications in one platform.

4. Odoo Modules

Module	Purpose
--------	---------

Project Project Management

Helpdesk Customer Support

5. Odoo Architecture

User

|

Web Browser

|

Odoo Server

|

Business Logic

|

PostgreSQL Database

6. Odoo Technology Stack

Component	Technology
Language	Python
Database	PostgreSQL
Frontend	HTML, CSS, JavaScript
Backend	Python
Views	XML
ORM	Odoo ORM
API	REST / XML-RPC / JSON-RPC

7. Odoo Editions

Community Edition

- Free
 - Open Source
 - Good for learning
 - Can customize
-

Enterprise Edition

- Paid
 - Extra modules
 - Official support
 - Mobile App
 - Studio
 - AI features (varies by version)
-

8. Real-world Example

Imagine an electronics store.

Customer buys a laptop.

Customer

↓

Sales Order

↓

Inventory updated

↓

Invoice generated

↓

Payment received

Accounting updated

Delivery scheduled

One action updates multiple departments automatically.

9. Why Learn Odoo?

Companies use ERP to manage business efficiently.

As someone learning AI, you can later add:

- AI Chatbots
- Demand Forecasting
- Customer Support Automation
- Resume Screening
- Sales Prediction
- Inventory Forecasting
- AI Report Generation

This is where your AI knowledge becomes a business advantage.
